WEEK 2018

FACE OF ACE

Introducing Courtney Heynen

Courtney began her learning journey at Uniting SA in December 2016

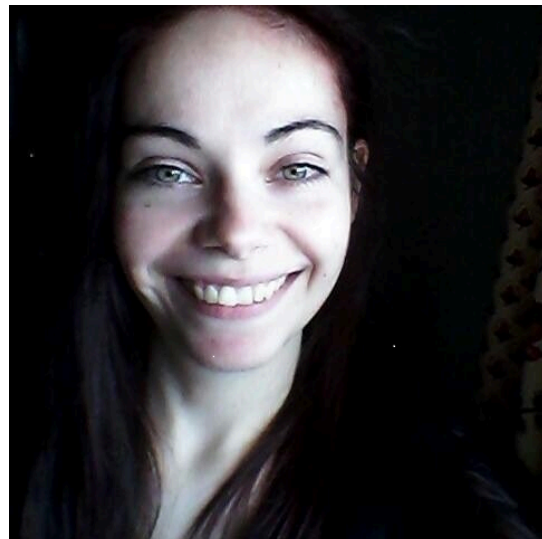

After completing school, Courtney was diagnosed with a learning difficulty. This diagnosis clarified a lot of things for her and encouraged her to commence a "Moving Forward" program. Courtney was an eager participant, taking every opportunity to gain further skills, and through this, she was able to secure an employment placement.

Courtney has learnt the value of goal setting and works hard to achieve all the goals she sets for herself. She is always pleasant, happy to help others in the classroom and willing to share her experience and knowledge. Courtney's positive outlook is contagious and her enthusiasm for learning is outstanding. She balances learning with other commitments, attending job search training whilst continuing voluntary work.

The ACE Program has given Courtney the motivation and confidence to completely change the direction of study she had been considering.

Courtney has commenced the Certificate II in Computer Assembly and Repair course and is doing extremely well.

Courtney is positive about what her future holds and looks forward to a bright future
